AKSHAY KUMAR DWIVEDI

FULL STACK DEVELOPER | SOFTWARE ENGINEERING

Greater Noida, India | +91 8864873703 | akshaydwivedi707@gmail.com
LinkedIn | GitHub | LeetCode (100+ problems) | Portfolio

PROFESSIONAL SUMMARY

Computer Science and Engineering undergraduate focused on full-stack web development, with hands-on, project-based experience building and integrating web applications across frontend, backend, APIs, and databases. Skilled in TypeScript, JavaScript, React, Next.js, Node.js, Express.js, REST APIs, MongoDB, and SQL databases. Built application features involving authentication, CRUD workflows, social feeds, chat integration, document processing, and semantic search. Strong in debugging, API integration, and translating application requirements into working features.

TECHNICAL SKILLS

Programming Languages: TypeScript, JavaScript, Java, Python (fundamentals), SQL, HTML5, CSS3

Frontend Development: React.js, Next.js, Tailwind CSS, responsive web development

Backend Development: Node.js, Express.js, REST API development, CRUD operations, JWT authentication, HTTP-only cookies, bcrypt

Databases: MongoDB, MongoDB Atlas Vector Search, PostgreSQL, MySQL, Pinecone

Tools & Engineering Concepts: Git, GitHub, Postman, Prisma, Docker (basics), Socket.IO, OOP, DBMS, Data Structures and Algorithms

AI & Search Technologies: Retrieval-Augmented Generation (RAG), embeddings, Jina AI, Gemini API, Ollama, Llama 3.2

PROJECTS

GoSocial — Full-Stack Social Media Application | React, JavaScript, Node.js, Express.js, MongoDB, Socket.IO | GitHub

- Developed and integrated core social application workflows including user authentication, feed, user search, post creation with image support, profiles, notifications, likes, and comments.
- Connected frontend screens to authenticated backend APIs and worked on chat integration with Socket.IO authentication and real-time state handling.
- Verified the frontend production build and debugged frontend–backend integration issues during development.

Assistora — AI Customer Support Platform | Next.js, TypeScript, MongoDB Atlas Vector Search, Jina AI, Ollama | GitHub

- Built a multi-tenant customer support application that retrieves business-specific knowledge to generate context-aware responses through a Retrieval-Augmented Generation (RAG) workflow.
- Implemented document ingestion and chunking, Jina embeddings, semantic retrieval with business-specific filtering, configurable AI agents, and authentication.

SupportIQ — AI Document Assistant | Next.js, TypeScript, Gemini API, Pinecone, RAG | GitHub

- Built a document question-answering workflow using PDF parsing, embeddings, vector storage, semantic retrieval, and language-model responses.
- Integrated document-processing and AI API flows to help users retrieve relevant information from uploaded content.

EDUCATION

B.Tech, Computer Science & Engineering — I.E.C. College of Engineering and Technology, Greater Noida | Expected 2027

CGPA: 6.5/10 | Class XII: 64.4% | Class X: 79%

ADDITIONAL INFORMATION

Certification: Complete Web Development Course — Udemy (Hitesh Choudhary), June 2026

Problem Solving: Solved 100+ problems on LeetCode; practice in data structures, algorithms, and coding fundamentals.

Development Experience: Independent, project-based web development experience (2025–Present).
